VIRTUAL STAFF TRAINING

The training was a great success and we were able to achieve our objectives.

Our Learning, Teaching, and Training (LTT) focused on stimulating the exchange of new and innovative ideas on ESL education, sharing effective digital tools and platforms for distance learning, and inspiring teachers to work on developing content for our SpeLiN app.

The training provided an opportunity for our team to learn from each other and share best practices. During the training, we discussed various digital tools and platforms that can be used for distance learning. We shared some effective strategies for creating engaging and interactive online learning experiences. Additionally, the partners received Content and Language Integrated learning (CLIL) training from AISR.

In addition to discussing tools and strategies, we also took the time to brainstorm and develop further content for our SpeLiN app. The app is an essential part of our project, and we want to ensure that it is packed with high-quality content that will help our students learn and grow.

We are excited to continue our journey of learning and growth, and we look forward to keeping you updated on our progress.
